AISA International NGO invites you to participate in an international meeting from December 27 to 31, 2019:

“Islamic Heritage: Sence and Essence”.

In their footsteps, and as a stage of the **Ahad-Unity Project**, there will be a seminar for the young that will follow the work begun in early summer in France and continued in August and November in Algeria. The participants in this meeting will benefit from plenary presentations of the work done by the seminarians.

The **Ahad-Unity Project** aims to highlight the richness and unity of Islamic heritage and make available to a wide audience the resources and teachings that are sometimes misunderstood by Muslim tradition and culture. The goal is to transmit to the new generations the message of the Culture of Peace so that they can live and build their future one with the other and not one against the other.

In a world in crisis and in full mutation, the **Ahad-Unity Project** aims to contribute to the advent of a new hope through the following objectives:

- Show how the spiritual tradition can provide an answer to the questions and concerns of our time;
- Rehabilitate the image of a free and responsible Islam;
- Transform our approach to negative problems in order to understand the positive;
- Assert the principle of uniqueness as a means of creating links between humans and all other creatures.

But how do we converge our strengths, powers, knowledge, assets and wills? If it is not by investing ourselves in a project: building a House of Peace, whose foundation is first and foremost the Culture of Peace through Unity.

A dream, some say, a utopia, but isn't our challenge to turn this dream into reality? A mission of global issues, a necessity for us and for future generations. A civic commitment, a common vision and a desire to live better together, to know each other better and to identify ourselves in our cities, our countries, our communities and our institutions.

For Living Together is to promote a shared vision of our community of destiny and enable our institutions to embrace a movement recognized locally, nationally and internationally. It promotes the essential values that a large part of humanity aspires to: pluralism, equity, justice, the sanctity of life and respect for the environment.

It is acting in synergy through concrete actions for the fulfillment of each, in mutual respect of differences.

It is to prevent radicalization and terrorism that thrive on the soil of injustices and inequalities.

It is to give a soul to globalization and to preserve the essence of being: its virtues, qualities and ethics. Its future depends on it!

It is finally to offer an education that preserves the richness of the cultural diversity of social links for «Living BetterTogether» that reconciles us with the whole of the living.

During this stay, all participants will be offered cultural visits, exchanges with seminarians, a Tunisian folklore party on December 30th and the 31st will be the end of year spiritual evening.

Program for December 27, 2019
